TABLE OF CONTENTS

		PAGE
Comparative study of spermogonia of rusts of *Abies* (with plates I–IV and two figures)	*Lillian M. Hunter*	1
Seasonal variation in specific conductivity of wood in tropical plants with reference to leaf fall (with seven figures)	*R. S. Inamdar* and *A. L. Shrivastava*	24
Structure of spore wall in *Ganoderma* (with plate V)	*Leslie C. Coleman*	48
Correlation of coal floras in Henry County, Missouri, and the Narragansett Basin (with three figures)	*Eda M. Round*	61
Evaporation rates in a North Florida hammock (with three figures)	*Frank Thone*	70
Significance of traces of elements not ordinarily added to culture solutions for growth of young orange trees (with six figures)	*A. R. C. Haas* and *H. S. Reed*	77
Chromosome numbers in buckwheat species (with plate VI and seven figures)	*Karl S. Quisenberry*	85
Dune formation by pine barren plants (with two figures)	*Arthur P. Kelley*	89
Influence of salt upon growth rate of asparagus (with two figures)	*Willem Rudolfs*	94
A study of a Mexican *Riccia*. Contributions from the Hull Botanical Laboratory **363** (with six figures)	*M. Arlouine Chesebrough*	99
Virulence, serological, and other physiological studies of *Bacterium flaccumfaciens*, *Bact. phaseoli*, and *Bact. phaseoli sojense*. Contributions from the Hull Botanical Laboratory **364** (with plate VII and eight figures)	*C. G. Sharp*	113
Correlation of host and serological specificity of *Bacterium campestre*, *Bact. flaccumfaciens*, *Bact. phaseoli*, and *Bact. phaseoli sojense*. Contributions from the Hull Botanical Laboratory **365**	*G. K. K. Link* and *C. G. Sharp*	145

225467

		PAGE
Relation of desiccating winds to fluctuations in ash content of citrus leaves and phenomenon of mottle-leaf (with three figures)	*A. R. C. Haas* and *H. S. Reed*	161
Differentiation of vascular bundle of *Trichosanthes anguina*. Contributions from the Hull Botanical Laboratory **366** (with plate VIII)	*Grace Barkley*	173
Distribution and abundance of *Spartina Michauxiana* at Douglas Lake, Cheboygan County, Michigan (with two figures)	*F. C. Gates, Edith C. Woollett,* and *E. P. Breakey*	185
Further studies on growth of *Chlorella* as affected by hydrogen-ion concentration (with three figures)	*F. B. Wann* and *E. F. Hopkins*	194
New species and varieties of Chlorophyceae (with plate IX)	*L. H. Tiffany*	202
Effect of reaction of solution on growth of alfalfa (with three figures)	*A. R. C. Haas*	207
Grouping of legumes according to biological reactions of their seed proteins (with two figures)	*I. L. Baldwin, E. B. Fred,* and *E. G. Hastings*	217
Behavior of certain fern prothallia under prolonged cultivation (with plate X and seven figures)	*David M. Mottier*	244
Ecology of fungi in the Chicago region. Contributions from the Hull Botanical Laboratory **367** (with six figures)	*V. O. Graham*	267
Origin and development of tissues in rhizome of *Pteris aquilina*. Contributions from the Hull Botanical Laboratory **368** (with eighteen figures)	*C. Y. Chang*	288
Relation between fruit size and abscission of young orange fruits	*A. R. C. Haas*	307
Biochemistry of plant diseases. IX. Pectic enzymes (with five figures)	*F. R. Davison* and *J. J. Willaman*	329
Alternation of generations in relation to reduction division	*Nils Svedelius*	362
Nature of the multiple seeded *Xanthium*. Contributions from the Hull Botanical Laboratory **369** (with nine figures)	*Charles A. Shull*	385

		PAGE
Anatomy and development of tomato flower (with plates XI, XII and seven figures) - - -	*Delmer C. Cooper*	399
Smoothness and roughness and spontaneous agglutination of *Bacterium citri*, *Bact. medicaginis* var. *phaseolicola*, *Bact. phaseoli sojense*, and *Bact. tumefaciens*. Contributions from the Hull Botanical Laboratory **370** (with three figures)	*G. K. K. Link* and *Kathleen L. Hull*	412
Cytological study of *Stigonema mammilosum*. Contributions from the Hull Botanical Laboratory **371** (with plate XII) - - - - - - -	*Sybel Lee*	420
BRIEFER ARTICLES—		
Shrinkage and growth in plant stems - -	*Raymond Kienholz*	103
The auximone theory - - - - - - -	*Florence A. Mockeridge*	314
Staining of yeast cells - - - - - - -	*A. P. Kelley* and *M. B. Shoemaker*	318
Isostigma peucedanifolium (Spreng.) Less., a valid name - - - - - - - - -	*E. E. Sherff*	425
CURRENT LITERATURE - - - - - - - -		106, 212, 319, 426
For titles of book reviews see index under author's name and reviews		
Papers noticed in "Notes for students" are indexed under author's name and subjects
